**Attachments:** NT Reissuance Letter-VAN020160-Norview Marina.pdf

Good morning, Jeremy,

Please see the attached Watershed GP transmittal letter. The facility was granted permit coverage on 9/7/2012 under Permit No. VAN020160.

This un-built facility indicated that it has no plans for WWTP construction during the next 5 years and was registered with TN and TP waste load allocations of 0 pounds/year. Therefore, please be sure to include the "Offset" special condition from GM 07-2008 (Amendment No. 2) in this individual permit. To provide consistency with the GP transmittal letter, the special condition language will need to be updated to state that the offset plan/proposal "shall be approved prior to the issuance of a Certificate to Construct for the new or expanded facility."

Please let me know if you have any questions.

Thanks,  
Drew

Hello Drew,

I just wanted to confirm with you that the owner of the subject VPDES permit has applied for and been granted coverage under the *General VPDES Watershed Permit Regulation for Total Nitrogen and Total Phosphorus Discharges and Nutrient Trading in the Chesapeake Bay Watershed of Virginia (9VAC25-820)*. If so, can you please provide the permit number under which coverage was granted, and also let me know if there are any deficiencies with regard to the application or fee payments that you might need assistance obtaining.

I plan to place your response to this email into the supporting fact sheet for the 2013 individual permit reissuance. Thanks!!
